

PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |            |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Teen Mobile Phone Addiction Detection   LINK</b><br><i>Machine Learning   Classification &amp; Regression   Scikit-learn   Pandas   Jupyter Notebook</i> <ul style="list-style-type: none"><li>Achived <b>Classification Accuracy</b>(IsAddicted or NotAddicted) of <b>91%</b></li><li>Predict the addiction level on a scale of 0 to 10 (regression).</li><li>Classify whether a teen is addicted (binary classification based on threshold).</li><li>Analyze which features contribute most to predicting mobile phone addiction.</li></ul>                         | June 2025  |
| <b>Cross Domain Fake Review Detection   LINK</b><br><i>Machine Learning   Cross-Domain Evaluation   Scikit-learn   Pandas   Jupyter Notebook</i> <ul style="list-style-type: none"><li>Developed a Machine Learning Model to detect fake reviews across multiple platforms(Amazom-&gt;Yelp).</li><li>Implemented NLP preprocessing to standardize text features across domains.</li><li>Balanced dataset using downsampling techniques to reduce bias.</li><li>Fine-tuned model to boost cross-domain accuracy from 55% to <b>60–65%</b> despite domain shift.</li></ul> | April 2025 |

SKILLS

|                                   |                                                                         |
|-----------------------------------|-------------------------------------------------------------------------|
| <b>Tools and Platforms</b>        | Github, Git, Jupyter Notebook, Selenium, IntelliJ IDEA / VS Code (IDEs) |
| <b>Frameworks &amp; Libraries</b> | Pandas, NumPy, Scikit-learn, Matplotlib / Seaborn, TensorFlow, JDBC     |
| <b>Programming Languages</b>      | Java, Python, C.                                                        |
| <b>Database &amp; OS</b>          | SQL, MongoDB, Windows, Linux.                                           |

EDUCATION

|                                                                                                                               |             |
|-------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Master of Computer Applications (MCA)</b><br>Vellore Institute of Technology   <b>CGPA: 8.2</b>                            | 2024 — 2026 |
| <b>Bachelor of Science in Computer Science (B.Sc. CS)</b><br>Ashoka Center for Business & Computer Studies   <b>CGPA: 8.9</b> | 2020 — 2023 |
| <b>Higher Secondary (12th)</b><br>H.P.T Arts & R.Y.K Science College   <b>Percentage: 73%</b>                                 | 2018 — 2020 |
| <b>Secondary (10th)</b><br>Army Public School, Devlali   <b>Percentage: 78%</b>                                               | 2016 — 2018 |

CERTIFICATIONS & ACHIEVEMENTS

|                                                                                                                                                                                            |                   |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Java Certification ( Java Oops feature )</b> , Udemy  LINK<br>Completed a comprehensive course covering OOPs, Java collections, multithreading, and real-world Java projects.           | June 2023         |
| <b>Add-on Course: Data Analysis Using Excel</b>  LINK<br>Learned data cleaning, pivot tables, charts, and basic statistical operations using Microsoft Excel.                              | 2020-2021         |
| <b>Python and Java Bootcamp</b> , LINK: PYTHON   JAVA<br>Hands-on learning of Python and Java fundamentals, syntax, and small-scale application development.                               | 2020-2021         |
| <b>GFG Nation SkillUp (In Progress)</b> , Java & Machine Learning — GeeksforGeeks<br>Covers Java core concepts and basic machine learning models through practical project-based learning. | Expected Aug 2025 |
