

ALOK PUNJ SHARMA

 ST1LLWATER  in Alok Punj Sharma  alokpunjofficial@gmail.com  Shillong, Meghalaya, India

PROJECTS

NSFW Classification

Fastify, Nodejs, Docker, Typescript, AI Classification

- Leveraged the performance and efficiency of Fastify to build fast and low-overhead APIs.
- Achieved API response times of up to 250ms through the use of Fastify and efficient coding practices.
- Utilized Docker and Docker Compose to containerize the application for easy deployment and scalability.

Bookmarkee

Nest.js, Nodejs, Typescript, Jest, Postgres

- Developed a set of bookmark APIs with features such as archiving, collections, authentication with efficient CRUD for all features.
- Utilized the modular architecture and robust feature set of NestJS(TS) to implement proper OOP principles and improve the scalability and maintainability of the bookmark management system.
- Wrote end-to-end tests using Jest to ensure the reliability and functionality of the APIs.

Bhej-io

Golang, Web-sockets, Gin

- Developed a Real-Time File Transfer Application: Implemented a web-based application for creating and joining rooms to facilitate real-time large file transfers between multiple users.
- Optimized via Multithreading for Large-Scale User Connections leveraging Go-routines to utilize publishing of data to every connected user.
- Implemented Real-Time data reception for receivers.

SKILLS

Languages

- JavaScript, Go Lang, Elixir, Python, Java, Typescript, HTML, CSS, Bash, SQL, PL/SQL, Solidity, Ruby, Django

Databases

- Redis, MySQL, PostgreSQL, Firebase, MongoDB

Architectures, Frameworks & Libraries

- React.js, REST, GraphQL, MQTT, VerneMQ, BullMQ, Websockets, Phoenix, Next.js, Node, Express, Nest.js, Vue.js, Bootstrap, Tailwind, Prisma, Sequelize, Mongoose, Angular

DevOps, Tools & Testing

- Git, Docker, Kubernetes, Postman, Nginx, Selenium, Puppeteer, Jest, AWS, GCP, Jira, BitBucket, Jenkins

EDUCATION

Bachelor of Sciences (Hons. Computer Science)

 July 2022  St. Anthony's College, Shillong

- CGPA 9

Masters of Computer Applications (Ongoing)

 May 2025  VIT Vellore

- CGPA 9.33 (Ongoing)

EXPERIENCE

Presence

Backend Engineer

 Mar 2022 - Dec 2024  Remote

- Architected and Managed Backend Infrastructure: Spearheaded the design and deployment of a robust backend infrastructure utilizing Kubernetes microservices, ensuring scalability and high availability.
- Optimized System Performance: Enhanced system responsiveness by up to 80% through strategic implementation of Redis as a caching layer, efficient database indexing, optimization of SQL queries, and development of high-performance PL/SQL methods for APIs.

Mercor

Backend Engineer

 June 2023 - Nov 2023  Remote

- Spearheaded the design and execution of a scalable backend infrastructure in Node.js and TypeScript for bar crawl management across the USA, collaborating with a vetted team for a US-based startup.
- Engineered high-performance tRPC APIs, serverless functions, and webhooks for optimized system efficiency and scalability.
- Orchestrated the creation of an innovative AI-GPT communication framework utilizing langchain as part of the internal team, significantly enhancing platform speeds by up to 200% for the AI-powered employee vetting and management service.

ACHIEVEMENTS

- **Leadership:** Led team of 15 people mentoring the application development hackathon by Postman.
- **MLH Don't Go Hacking My Heart:** Achieved 2nd Place in MLH hackathon among 200+ participants and 70+ submissions.
- **MLH A Hack A Day:** Awarded 3rd Place in MLH hackathon among 120+ participants and 50+ submissions.
- **Hack The League:** Secured 1st Runner Up in HTL hackathon among 1700+ participants.
- **Hackathons:** Experienced 10+ hackathons with 8+ wins.

CERTIFICATIONS

- MongoDB Certified Associate Developer 
- Postman Student Expert 
- Git 
- Intermediate SQL 
- Database Design
